CENTER FOR TECHNOLOGY, ESSEX

2 Educational Drive, Essex Junction, VT 05452

To Whom it May Concern:

Richard Peters will complete the Computer Animation and Web Design 2 program at the Center for Technology in June 2024. Richard meets course requirements in photography, web design, motion graphics, animation and game development. Richard enjoys many areas of the program, especially 3D modeling. He is well versed on many industry relevant software platforms like the Adobe Creative Suite, Blender as well as the Unity and Unreal game engines.

In addition to coursework in the program, Richard earned an IRC (industry recognized credential) from the Web Professionals organization at the associate level as well as college credits for completing the Python programming and Photography courses at the Community College of Vermont.

Richard is a kind and thoughtful student. He is well received by his peers, is a ready and willing group participant and is not afraid to take on challenges. I think Richard's strength is in his sharing of ideas and his contribution working in team settings with a clear set of deliverables. This was most evident during our SkillsUSA competitions where students competed in teams against a challenge prompt. Richard and his partner earned a bronze for their work.

Richard is interested in continuing his college coursework and learning while working full time. He is motivated, dependable and willing to learn.

Please don't hesitate to contact me if you have any questions. (802)-881-1818

Sincerely,

Will Bohmann
